EXAMINER'S AMENDMENT

The following is an examiner's statement of reasons for allowance: the prior art of record teaches method of fabricating a liquid crystal display, which has a step of ejecting spacer dispersion liquid obtainable by dispersing a spacer in a dispersion medium in a specific region of the surface of a substrate from a nozzle of an ink-jet system and locating the spacer in a specific region on the substrate, at least 80% by weight of the dispersion medium having a boiling point of 200.degree. C. or lower and a contact angle of 5.degree. or smaller on the substrate and in the step of locating the spacer in a specific region on the substrate. The prior art of record does not teach nor suggest the spacer dispersion liquid being ejected in a specific region of the surface of the substrate at the interval of distribution S (μm), satisfying a relationship of the following formula (1): $S \geq 20 (V/D)^{1/2}$ (1), in the formula, V represents droplet volume (pL) of the spacer dispersion liquid ejected once from a nozzle and D represents a particle diameter (μm) of the spacer contained in the spacer dispersion liquid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
